TECHNICAL CONSULTING AND SUPERVISION

Eduardo Ubieta

DESIGN

Ikur, S.A.

PERCENTAGE OF THE POPULATION AGED 20-24 TO HAVE COMPLETED AT LEAST UPPER SECONDARY EDUCATION (ISCED 3A, 3B AND 3C).

European Union Objective for 2010: At least 85% of 22 year olds to have completed upper-secondary education.

It is very important that a majority share of the adult population obtain upper secondary qualifications with a view to increasing the educational level among the population in general and in the labour force in particular.

In addition to preparing students for tertiary education, the education and training provided at this level can be considered terminal, providing sufficient intellectual and human maturity and technical training for the appropriate integration of young people in both tertiary education and working life.

To participate satisfactorily in the knowledge based society, it is necessary to have the basis provided by upper secondary education.

The average percentage for completion of upper secondary education in EU 27 in 2007 was 78.1%. Evolution since 2000 has been constant but has only increased by 1.5% which suggests it will be difficult to reach the objective for 2010. However, in 2007, 9 countries in the EU had already achieved the objective such as Cyprus (85.8%) and the Czech Republic (91.8%), the country with the highest percentage. Countries with the lowest percentages include Portugal (53.4%) and Malta (54.8%) despite the fact that between 2000 and 2007 they experienced increases of 10.2% and 13.8% respectively.

In the Basque Country between 1992-1999 the population in this age range to have completed upper secondary education rose from 69.3% to 83.2%. In contrast, from 2000 to 2007 the percentage was around 81% a figure which, in view of the evolution of this period is relatively far from the European Union's objective of 85% for 2010. However, women in this age range in the Basque Country (86.6%) have exceeded the objective.

In the Spanish regions the situation is worse as the evolution between 2000 and 2007 was negative overall and in all the regions except for Extremadura and Galicia where the share increased by 2.8% and 2.5% respectively. The average for the Spanish regions was 61.1% in 2007, with the Basque Country reporting the highest percentage, 80.8% and Ceuta and Melilla reporting the lowest percentage, 37.5%.

Rs8

Upper-secondary completion rate

BASQUE INSTITUTE FOR
RESEARCH AND EVALUATION
IN EDUCATION

This indicator also shows substantial differences between men and women, and the difference has continued throughout the years.

In 2007 in the European Union, the Spanish Regions and the Basque Country the percentage of women obtaining upper secondary certification was always higher than men.

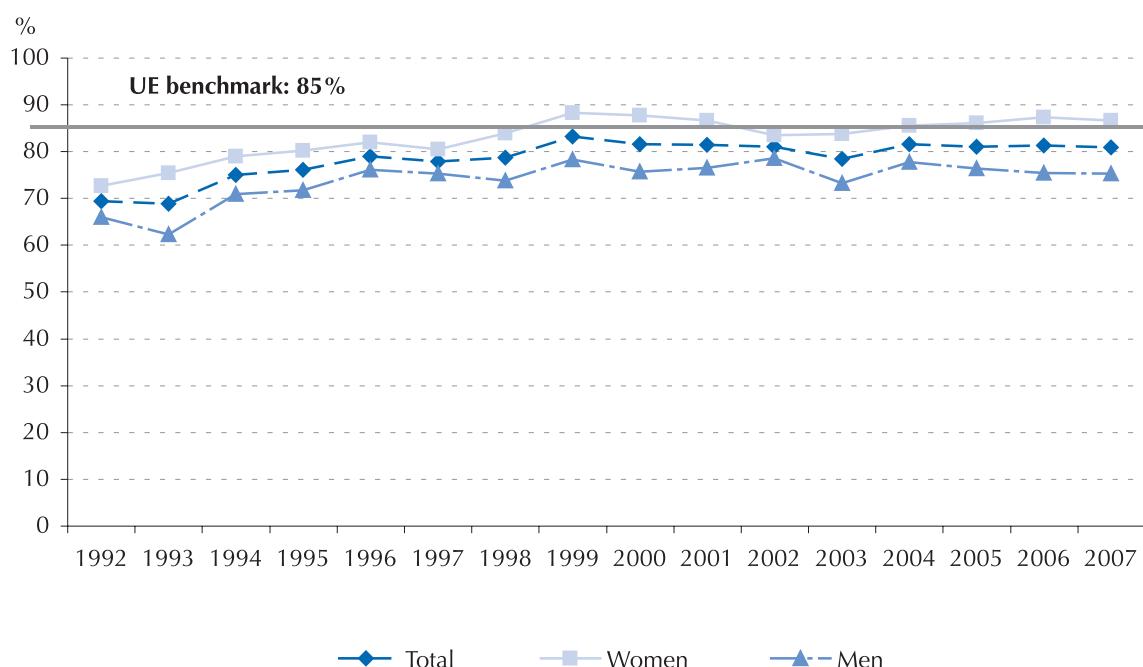

Table and Graph Rs8.1:

Percentage of the population (20-24 years) having completed upper-secondary education (ISCED 3A, 3B and 3C). Total, by sex. CAE data.

YEAR*	Both sexes	Women	Men	Difference
1992	69.3	72.6	66.0	6.6
1993	68.8	75.4	62.2	13.2
1994	74.9	78.9	70.9	8.0
1995	76.0	80.2	71.7	8.5
1996	79.0	82.0	76.1	5.9
1997	77.8	80.5	75.2	5.3
1998	78.6	83.8	73.7	10.1
1999	83.2	88.3	78.2	10.1
2000	81.5	87.6	75.7	11.9
2001	81.4	86.5	76.4	10.1
2002	80.9	83.4	78.6	4.8
2003	78.3	83.7	73.2	10.5
2004	81.5	85.5	77.7	7.8
2005	81.0	86.0	76.3	9.7
2006	81.2	87.3	75.3	12.0
2007	80.8	86.6	75.3	11.3

*1992-1999 data are for the 2nd quarter. 2000-2007 data are yearly and have been calculated with EPA-2005 methodology.
