## Statistics Canada

## Reading achievement of Canadian students in minority language school systems and French immersion programs

Tamara Knighton

March 6, 2009

## Presentation Outline

- Context
- Organization of Education
- Official languages policy
- Provincial variation in reading achievement
- Achievement of students in minority language schools
- Achievement of students in French Immersion programs

## Context: Organization of Education in Canada

- Education falls under provincial/territorial jurisdiction
- 13 education systems (10 provinces, three territories)
- no national or federal department of Education
- Government of Canada plays an support role in education
- Mandates of several government departments intersect with education
- Postsecondary education funding
- Human Resource Development
- Official languages

## Context: Official Language policy

- Official Languages Act (Section 41)
- The Government of Canada is committed to
- (a) enhancing the vitality of the English and French linguistic minority communities in Canada and supporting and assisting their development; and
- (b) fostering the full recognition and use of both English and French in Canadian society
- Implemented through the Official Language Support Programs

## Official Language Support

## Programs

- Minority language education
- Second Language learning
- Funding to the provinces with CMEC
- Goes to support second language programs in schools
- Core French and English
- Extended (French)
- Intensive (English and French programs)
- Immersion (French)

## Canada performs among the top in <br> PISA

## Provincial differences in performance exist

## Explaining Provincial variation

- Students' family background
- About $40 \%$ of the variation in provincial mean scores is attributable to students' family background (gender, socioeconomic status, foreign-born)
- School practices and policies
- Some of the variation is attributable to measurable aspects of school resources and classroom and school policy and practices
- Effects of any particular factor are fairly small
- Results for 8 of the 10 provinces are quite similar after controlling for above factors

## Minority language performance

- French schools outside of Quebec and English schools in Quebec
- Test language = minority language
- Minority language school systems sampled separately in 5 provinces
- Nova Scotia (N.S.)
- New Brunswick (N.B)
- Quebec (QC)
- Ontario (ON)
- Manitoba (MB)

## Reading achievement of students in minority language schools

## Do students in minority language school

 systems differ from those in majority language schools?- A number of important factors were identified which distinguish students in minority-language schools from those in majority language schools.
- Mother tongue, language use at home and exposure to the language in the community
- School resources
- Family background

## Mother tongue of students in minority language schools

## School language use at home

## Language exposure in the community

Average \% of anglophones in community

## Use of French in the community

\% of francophones who speak french at home

## School characteristics

- Students in minority language schools were more likely to be in schools
- with lower student-teacher ratio
- where principals where more likely to report that inadequate material resources and teacher shortages hindered student learning
- Hindered by inadequate instructional resources

## Minority language performance

## summary

- Minority language students have lower reading achievement
- Profile of minority language students differ with respect to a number of important variables (family background, school resources, community characteristics)
- However differences are not consistent across province
- In each provinces, students appear to be influenced by different combinations of factors

## Reading achievement of students in French Immersion programs: background

- French Immersion programs exist in Englishlanguage schools in all 10 provinces
- For this presentation French Immersion programs are defined as programs in which $25 \%$ or more of instruction is provided in French
- Test language is language of major PISA domain
- Complex to identify since domain may be offered in both languages
- Majority of students tested in English

## Language of PISA test for French Immersion students

## Proportion of students enrolled in French Immersion programs

|  | Enrolled in French immersion | Enrolled in Immersion and had started before grade 4 (early immersion) | Girls |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Immersion | Non- immersion |
|  | Percentage of students |  |  |  |
| Newfoundland and Labrador | 7 | 57 | 64 | 50 |
| Prince Edward Island | 20 | 59 | 58 | 51 |
| Nova Scotia | 12 | 21 | 58 | 49 |
| New Brunswick | 32 | 39 | 61 | 46 |
| Quebec | 22 | 74 | 52 | 48 |
| Ontario | 6 | 57 | 64 | 51 |
| Manitoba | 6 | 90 | 60 | 48 |
| Saskatchewan | 3 | 87 | 65 | 48 |
| Alberta | 4 | 80 | 59 | 47 |
| British Columbia | 2 | 55 | 61 | 49 |

## Students in French Immersion have higher achievement

## Note on performance of French <br> Immersion students

- Students in French Immersion programs took a minimum of $25 \%$ of their classes in French
- 95\% of students wrote the PISA assessment in English
- was the language of instruction in major domain (Reading) or
- language of instruction was mixed and thus decision on test language was made by School Contact
- Students performed well in PISA test in English despite receiving at least $25 \%$ of their classroom instruction in French

## What accounts for the higher performance of students in French Immersion programs?

- Factors examined
- Gender composition of students in French Immersion programs
- Socioeconomic background
- Parental education

## Gender Composition of students in French Immersion programs

- Girls consists of the majority of students in French Immersion programs (52-65\% across provinces)
- Girls have higher reading achievement
- Explains only part of the difference
- Reading performance is still higher after controlling for gender

## Students in French Immersion programs come from

 higher socioeconomic backgrounds|  | International Socioeconomic Index of Occupational Status (highest parent) (Canada average $=53$ ) |  | $\%$ of students in top Canadian quartile of family socio-economic status |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Immersion | Nonimmersion | Immersion | Nonimmersion |
| Newfoundland and Labrador | 59 | 46 | 41 | 13 |
| Prince Edward Island | 55 | 48 | 26 | 17 |
| Nova Scotia | 58 | 51 | 34 | 18 |
| New Brunswick | 56 | 49 | 31 | 16 |
| Quebec | 57 | 55 | 36 | 27 |
| Ontario | 58 | 54 | 35 | 27 |
| Manitoba | 53 | 50 | 21 | 18 |
| Saskatchewan | 55 | 51 | 26 | 19 |
| Alberta | 60 | 54 | 43 | 25 |
| Britisha Columbia | 55 | 53 | 27 | 24 |

## Differences in performance still exists when controlling for socio-economic background

Reading achievement of students with family socioeconomic status in the top quartile

## Parents of French immersion students are more likely

to have postsecondary education

Percentage of students with at least one parent with a postsecondary education

|  | Immersion | Non-immersion |
| :--- | ---: | ---: |
| Newfoundland and Labrador | $\mathbf{8 3}$ | $\mathbf{5 7}$ |
| Prince Edward Island | $\mathbf{7 4}$ | $\mathbf{6 0}$ |
| Nova Scotia | $\mathbf{7 7}$ | $\mathbf{5 9}$ |
| New Brunswick | $\mathbf{7 0}$ | $\mathbf{5 3}$ |
| Quebec | 73 | 65 |
| Ontario | 77 | 68 |
| Manitoba | 61 | 56 |
| Saskatchewan | $\mathbf{7 1}$ | $\mathbf{5 8}$ |
| Alberta | $\mathbf{8 6}$ | $\mathbf{6 3}$ |
| British Columbia | $\mathbf{6 3}$ | $\mathbf{6 4}$ |

## Differences in performance still exists when <br> controlling for parental background

## Reading achievement of students with at least one parent with postsecondary education

## Performance of students in French <br> Immersion programs: Summary

- Students in French Immersion programs have higher reading achievement
- Gender composition, socioeconomic background and parental education do not account for these differences
- Other factors may be involved
- Environment in which students live and learn
- Student selection
- Attrition from French Immersion programs
